

TSMC's \$165 Billion U.S. Investment Reshapes Global Semiconductor Landscape

Mini Article

Taiwan Semiconductor Manufacturing Company (TSMC) has announced a monumental \$165 billion investment in the United States, marking its largest overseas commitment to date. This expansion includes plans for three new fabrication plants, two advanced packaging facilities, and a major research and development center, solidifying this project as the largest single foreign direct investment in U.S. history. This strategic move comes amid escalating political and economic pressures, particularly concerning U.S.-China relations. The investment has ignited significant discourse in Taiwan regarding the nation's pivotal role in the global semiconductor industry. Concurrently, China's DeepSeek is making waves in the artificial intelligence sector with its free open-source model, prompting competitors to reevaluate their strategies. Additionally, Shenzhen SiCarrier Technologies, supported by Huawei, is developing chipmaking tools aimed at countering U.S. export controls and reducing reliance on Western equipment. These developments underscore the rapidly evolving landscape of technology and international trade.

After a little over a year, ICS Newspaper has returned with a new issue, our first for 2025. We have spent a lot of time and effort preparing this issue of the ICS Newspaper, and hope that you enjoy it.

Thank you to our students, teachers, and supporters for their hard work and contributions to this edition.

Economy: World Economics in 2025

The global economy in 2025 is growing at a slow pace, with inflation, high debt, and geopolitical tensions creating significant challenges. While markets are stabilizing, rising costs and shifting economic dynamics continue to create uncertainty. The future of the economy depends on how businesses, workers, and policymakers adapt to these ongoing risks.

Global Impact of the Ukraine-Russia War

The Ukraine-Russia conflict is disrupting food and energy supplies, causing shortages and price hikes. It highlights the need for global cooperation to address its impacts.

More about this on pages 9 & 10

The Struggle for Women's Rights

Despite progress, women still face significant challenges, including the gender pay gap, violence, and lack of political representation. High rates of domestic violence and sexual assault persist globally, often due to weak legal measures.

The Battle of Çanakkale

The Battle of Çanakkale (1915), driven by strategic control over the Çanakkale Strait, involved intense naval and land battles between the Allies and Ottomans. Allied defeat extended WWI, indirectly triggered Russia's 1917 Revolution, and significantly influenced Turkish national identity by boosting Mustafa Kemal's prominence, profoundly shaping 20th-century geopolitics and international relations.

Transition to Modern Medicine in the Ottoman Empire

The Ottoman Empire played a key role in the early development of smallpox and rabies vaccines, introducing inoculation methods before Jenner and later adopting Western advancements. Despite challenges, such as limited scientific infrastructure, the empire contributed to global medical progress, laying the foundation for modern vaccine production in Turkey today.

The World Economy in 2025: What's Growing, What's Struggling, and What's Next

Written by **Leyla Mammadzada**

1. Is the economy getting better, or will new troubles come? As we get through 2025, markets around the world are growing slow but sure. Prices are now stable, and work areas are changing with the new money setups. But, high loan costs, trade fights, and big world risks still change money scenes everywhere. What does this mean for businesses, workers, and everyday consumers? Here's a look at the key trends driving the economy this year.

2. The global economy in 2025 is growing slowly (3.2%) but facing challenges like inflation, record-high debt (\$318 trillion), and geopolitical tensions. Consumer confidence is dropping, and some regions, like Turkey, are struggling more than others. Policymakers are balancing growth with stability to avoid a deeper slowdown.

3. Inflation stands out as a big worry in talks about money today because it hits how much people can buy, save, and the all-round money safety. When prices for needful things go up, everyone sees higher living costs, which cuts what they can spend on other things and may make money gaps wider. Banks and leaders try to control inflation with money rules and spending plans; yet, how well these work often ties to outside things like world trade ways, world oil prices, and land fights. Knowing the long haul impact of inflation is key for both rule makers and everyday people as they deal with the twists of a changing world market.

4. As 2025 unfolds, the economy steadies, but risks remain. How businesses, workers, and policymakers respond will shape the financial future for all.

The Transition to Modern Medicine in the Ottoman Empire: The Revolution Brought by Vaccination

Written by **Zehra Naz Bozlar**

During the 18th and 19th centuries, the Ottoman Empire played both a pioneering and a following role in the development of smallpox and rabies vaccines. Before Edward Jenner's discovery of the smallpox vaccine in 1796, the Ottomans were already using inoculation methods against smallpox. By injecting fluid taken from individuals who had experienced a mild form of the disease into healthy individuals, they ensured that the illness was contracted in a less severe form. Lady Montagu, the wife of the British ambassador serving in the Ottoman Empire during the 18th century, introduced these Ottoman vaccination techniques to Europe, leading to their widespread adoption in the West.

Article Continues on Page 3 →

In the 19th century, however, the Ottoman Empire adopted Jenner's method, positioning itself as a follower of Western advancements. In 1895, under the leadership of Hüseyin Remzi Bey, the first smallpox vaccine production center, Telkikhâne-i Şahane (Vaccine House), was established, marking the institutionalization of vaccine production in the empire.

The progress of the Ottoman Empire in rabies vaccination was even more rapid. Following Louis Pasteur's development of the rabies vaccine in 1885, the Ottoman government sent a delegation to Paris to learn about this new method. In 1886, a team consisting of Zoeros Pasha, Hüseyin Remzi Bey, and Veterinarian Hüseyin Hüsni Bey received training in Pasteur's laboratory and, upon returning to the Ottoman Empire, initiated the production of rabies vaccines. In 1887, the Daülkelb and Bacteriology Operating Room was established, making the Ottoman Empire the third country in the world to have a rabies vaccine center after Pasteur's laboratory in Paris.

However, due to a lack of scientific infrastructure, the Ottoman Empire lagged behind the West. Basic laboratory tools such as microscopes arrived late in the empire, limiting scientific research capabilities. By the late 19th century, Ottoman physicians had begun receiving training in countries like Germany and France, but these efforts did not lead to significant scientific development within Ottoman territories. Nevertheless, by swiftly adopting Pasteur's methods, the Ottoman Empire strengthened its modern medical infrastructure.

Today, Turkey has reached a significant point in vaccine production, inheriting the scientific legacy of the Ottoman Empire. The Ottoman efforts in smallpox and rabies vaccination remind us of the importance of investing in science and strengthening scientific infrastructure.

Women's Fashion: From Past to Present

Written by İdil Kalyencioğlu

Women's fashion varies across civilizations and has evolved over time due to changing living conditions.

Fashion in the Early 20th Century

At the beginning of the 20th century, dresses were generally tight, fitted, and body-hugging. Women achieved this tightness either by using corsets or through tailored cuts. They preferred clothing that accentuated their body curves and gradually began to develop their own unique styles, choosing outfits that reflected their personalities.

Article Continues on Page 4 →

1910s Fashion

In the early 1900s, skirts became narrower, and long skirts started to shorten. Due to the ongoing **World War I**, women opted for more practical, functional, and comfortable clothing. While two-piece outfits were common for daily wear, evening dresses were usually worn as a single piece. Initially, evening gowns were floor-length, but within a few years, they shortened to ankle-length. The impact of **World War I** led women to favor more formal clothing styles.

1920s Fashion

The 1920s were marked by the rise of dance styles, which influenced clothing. Dresses featured fringes and tassels, and long, dangling accessories became fashionable. Compared to the wartime period, women in the 1920s adapted more to fashion. Elegant and glamorous evening dresses gained popularity. Just like in clothing, accessories also reflected opulence. Wedding dresses during this period were adorned with sparkles and embellishments, often complemented by hair accessories. Instead of cinched waists, dresses emphasized the hips.

1930s Fashion

During the 1930s, designs that highlighted women's body curves emerged. Instead of short skirts, hemlines extended below the knees. The use of waistlines in dresses was revived, creating a contrast with the 1920s' looser silhouettes. Simplicity took center stage, and extravagant styles faded. Off-the-shoulder dresses, waist-cinching silhouettes, and full skirts became fashionable. The influence of **World War II** led to an increase in military-inspired colors. Unlike previous decades, backless dresses became more popular than leg-revealing designs, and slits and low backs were even incorporated into casual wear. Skirts emphasized the hips for a more defined silhouette.

1940s Fashion

Fashion in the 1940s was heavily influenced by **World War II**. Women preferred more comfortable, simple, and practical outfits. Economic struggles during the war caused fabric shortages, leading to more fitted dress designs. Skirt lengths also dropped below the knees. Shoulder pads were used in dresses to highlight broad shoulders, reflecting the era's military-inspired aesthetic. Clothing choices were largely dictated by wartime necessities.

1950s Fashion

With the end of the war, clothing became more expressive and elegant. Women started opting for refined yet comfortable outfits. Skirt lengths increased again, and chest-revealing necklines became more prominent. Dresses that accentuated the waist and hips gained popularity. Accessories such as hats became fashionable, and skirts were designed with slits to facilitate movement. Corsets regained popularity to emphasize body curves, and polka dot patterns emerged as a notable trend.

Article Continues on Page 5 →

1960s Fashion

The 1960s marked a shift toward a **freedom-oriented** fashion movement, contrasting with previous decades. With advancements in technology, ready-to-wear fashion gained prominence. Clothing became more accessible, and patterned dresses remained trendy, with large floral designs being particularly popular. The 1960s also saw the rise of short dresses, replacing monochrome outfits with more colorful styles. Dresses featured voluminous, flared skirts, adding a playful and dynamic element to women's fashion.

1970s Fashion

During the 1970s, femininity became the focus of fashion. Mini dresses and figure-enhancing outfits gained popularity. Nature-inspired clothing was a major trend, with **earthy tones, browns, and greens** leading the color palette. Oversized earrings were a staple accessory. Shiny fabrics like **satin** and **velvet** became fashionable, along with large floral and checkered patterns. Shirt dresses also became widely worn. Backless designs were a common feature of evening wear.

1980s Fashion

The 1980s were the most **extravagant** era in fashion history. Unlike previous decades, balance and harmony were abandoned in favor of **bold and chaotic** styles. Clothing featured **bright colors and striking combinations**, allowing individuals to express their personalities through fashion. Evening dresses were colorful and adorned with beads. Wedding dresses reflected the excessive aesthetics of the time, featuring **elaborate designs** with lace and exaggerated details.

1990s Fashion

The 1990s moved away from the excess of the 1980s and embraced a **simpler, more relaxed** aesthetic. While colorful outfits remained popular, they were **less flashy and bright** compared to the previous decade. Short floral dresses became trendy. During this era, skirts were typically short, making them a defining feature of 1990s fashion.

2000s and Beyond

In the **2000s**, urban life influenced fashion choices. The rise of **hip-hop music** played a significant role in shaping clothing trends, leading to the popularity of **baggy outfits**. Plaid patterns became trendy in the early 2000s. Body-hugging, short dresses gained popularity, and thick belts were often used as accessories. The 2010s saw an increase in the use of **bright, neon colors**, alongside a shift towards pastel tones. Two-piece outfits became fashionable again. In later years, long skirts and **powdery hues** were introduced. Slits and low-cut designs remained a part of mainstream fashion. At times, older styles were revisited and reinvented, allowing people to dress more freely and according to their personal style while staying in line with contemporary fashion trends.

Weather Forecast for 28th of March 2025

On Friday, March 28, 2025, in İzmir, Turkey, the weather is expected to be mostly cloudy with a high temperature around 22°C (72°F) and a low of approximately 12°C (54°F). Rain is anticipated, accompanied by windy conditions. It's advisable to carry an umbrella and wear layers to stay comfortable throughout the day.

21st of March: International Colour Day

Written by *Meiling Kamilova*

International Colour Day is an annual event held on March 21 to celebrate colour. This date was chosen because it is around the equinox, when “the sun shines directly on the equator,” and thus, the duration of day and night are approximately equal in length around the world.

The day was established by the International Colour Association, which is composed of national colour organisations and members representing over 30 countries.

Human Eye

The human eye can see about **10 million** variations of colour, including **1000 levels** of light-dark, **100 levels** of yellow-blue, and another **100 levels** of red-green.

Different Colours

Red: excitement, love, and energy

Orange: confidence, bravery, and success

Yellow: creativity, happiness, and warmth

Green: healing, freshness, and tranquility

Blue: trust, peace, and loyalty

Pink: compassion, sincerity, and sweetness

Purple: royalty, ambitious, and luxurious

Brown: trustworthy, dependable, and simple

Black: formal, dramatic, and sophisticated

White: clean, innocent, and honest

Cinema in February 2025

Written by *Melis Seyhan*

February 2025: A Thrilling Month for Moviegoers.

February 2025 was an exciting month for cinema lovers, with numerous domestic and international films captivating audiences and achieving impressive box office results. Among the most-watched and highest-grossing films in Turkey were *Aşk Sadece Bir An* and *Captain America: Brave New World*.

Aşk Sadece Bir An

Aşk Sadece Bir An premiered on February 14, 2025, and received significant attention from audiences. During its opening weekend, the film was watched by **25,897 viewers**, eventually reaching a total of **440,134 viewers**. The weekend box office revenue was recorded at **4,815,211 TL**. These numbers indicate that the film garnered substantial interest in its initial weeks, demonstrating strong box office performance.

Article Continues on Page 7 →

Captain America: Brave New World

Captain America: Brave New World also premiered on February 14, 2025, and was met with great enthusiasm. During its opening weekend, the film attracted **10,150 viewers** and went on to reach a total audience of **203,340**. However, its weekend box office earnings were recorded at only **10,150 TL**, an unexpectedly low figure. Despite the apparent strong audience interest, the revenue numbers suggest a discrepancy in its box office performance.

The Global Success of “Ne Zha 2”

The Chinese animated film *Ne Zha 2* achieved remarkable box office success in February. Released on **February 6**, the film amassed an astounding **5.77 billion yuan (approximately 804 million USD)** at the box office, making it one of the highest-grossing films of all time. Additionally, by **February 8**, it had surpassed **1 billion USD** in box office revenue, becoming the **first non-Hollywood film to achieve this milestone**.

Maria

Maria is a biographical drama depicting the final days of world-renowned opera singer **Maria Callas** in the 1970s. Starring **Angelina Jolie** in a deeply moving performance as Callas, the film brings emotional depth to her story. Turkish actor **Haluk Bilginer** also plays a significant role in the film.

During its opening weekend in Turkey, *Maria* was watched by **20,065 viewers**, ranking **second at the box office**. By the end of its run, it had reached a total of **38,162 viewers** and generated **10,166,461 TL** in revenue. However, these figures fell short of expectations, making the film a **box office disappointment**. Moreover, its **absence from the Academy Award nominations** surprised both audiences and critics alike.

A Memorable Cinematic Month

February 2025 will be remembered as the month when **Angelina Jolie’s *Maria*** reached audiences, despite falling short of box office expectations. Jolie’s artistic versatility and contributions to cinema were once again highlighted by this significant step in her career.

Sports: Notable Transfers in the Trendyol Süper Lig (2024-2025 Mid-Season)

Written by **Yağız Erdoğan**

The 2024-2025 mid-season transfer window in the Trendyol Süper Lig ran from January 13 to February 11, 2025. During this period, clubs made several high-profile signings to strengthen their squads for the remainder of the season. Below are the standout transfers that could have a significant impact on the title race and overall league performance.

Article Continues on Page 8 →

Galatasaray

- **Álvaro Morata**
 - *Position:* Forward
 - *Previous Club:* AC Milan
 - *Transfer Type:* Loan until 2026
 - *Loan Fee:* €6 million
 - *Salary:* €6 million per year (optional)
 - *Purchase Option:* €8 million (for permanent transfer)

Fenerbahçe

- **Carlos Cuesta**
 - *Position:* Center-back
 - *Previous Club:* Genk (Belgium)
 - *Transfer Fee:* €8 million
- **Diego Carlos**
 - *Position:* Center-back
 - *Previous Club:* Aston Villa (England)
 - *Transfer Date:* January 23, 2025
- **Milan Škriniar**
 - *Position:* Center-back
 - *Previous Club:* Paris Saint-Germain (France)
 - *Transfer Date:* January 30, 2025
- **Anderson Talisca**
 - *Position:* Attacking Midfielder
 - *Previous Club:* Al-Nassr (Saudi Arabia)
 - *Transfer Date:* January 28, 2025
- **Ognjen Mimović**
 - *Position:* Young Talent
 - *Transfer Date:* January 31, 2025

Trabzonspor

- **Danylo Sikan**
 - *Position:* Forward
 - *Previous Club:* Shakhtar Donetsk (Ukraine)
 - *Transfer Date:* January 22, 2025
- **Oleksandr Zubkov**
 - *Position:* Winger
 - *Previous Club:* Ferencváros (Hungary)
 - *Transfer Date:* February 3, 2025
- **Mustafa Eskiheleç**
 - *Position:* Midfielder
 - *Previous Club:* Gaziantep FK
 - *Transfer Date:* February 8, 2025
- **Tim Jabol Folcarelli**
 - *Position:* Young Talent
 - *Transfer Date:* February 12, 2025

Article Continues on Page 9 →

Sivasspor

- **Veljko Simić**
 - *Position:* Midfielder
 - *Previous Club:* TSC Bačka Topola (Serbia)
 - *Transfer Date:* February 1, 2025
- **Efkan Bekiroğlu & Tolga Ciğerci**
 - *Position:* Midfielders
 - *Transfer Date:* January 12, 2025

Çaykur Rizespor

- **Samet Akaydın**
 - *Position:* Defender
 - *Transfer Date:* January 24, 2025
- **Berkay Özcan**
 - *Position:* Midfielder
 - *Transfer Date:* February 11, 2025

Eyüpspor

- **Umut Bozok**
 - *Position:* Striker
 - *Transfer Date:* February 3, 2025

Bodrumspor

- **Enis Bardhi**
 - *Position:* Midfielder
 - *Previous Club:* Levante (Spain)
 - *Transfer Date:* January 24, 2025

With these strategic signings, Süper Lig clubs are setting up for an exciting second half of the season. These new arrivals will look to make an immediate impact as the title race intensifies.

The Effects of the Ukrainian-Russian War on the World

Written by Sevil Mammadzada

The Ukraine Food Shortage Crisis

Ukraine has long been referred to as the “breadbasket of Europe” due to its crucial role in global food production. As one of the largest exporters of grains in the world, including wheat, corn, barley, and sunflower oil, Ukraine plays an essential part in feeding millions across the globe. However, the ongoing conflict with Russia has drastically damaged agricultural output and has significantly reduced global food supplies.

Article Continues on Page 10 →

The war has not only created devastating humanitarian consequences for Ukraine but also affected the global economy. Since Ukraine is a key supplier of grains like wheat and corn, the conflict has led to higher food prices everywhere. Many countries, especially in Africa, the Middle East, and Asia, rely on Ukraine's exports, and now they are facing rising food costs and hunger. This situation has caused inflation and made the economy unstable in many parts of the world.

Russia's Export Challenges and Global Impact

Additionally, Russia is a major exporter of goods like oil, natural gas, metals, and wheat. However, due to the war and sanctions, Russia's ability to export these essential items has been severely limited. Many countries that depend on Russian energy, such as gas and oil, are now facing energy shortages and rising prices. Additionally, nations that rely on Russia for metals and other raw materials are struggling to find alternative suppliers, causing disruptions in industries like manufacturing. This has led to increased costs worldwide, affecting global trade and economies.

Conclusion

The war between Ukraine and Russia has caused major problems worldwide. Ukraine's reduced grain exports have led to food shortages and higher prices. Russia's limited energy exports have resulted in energy shortages and increased costs. These issues have strained economies and heightened global tensions, emphasizing the need for international cooperation to restore stability and address the widespread impacts of the conflict.

From Past to Present: The Struggle for Women's Rights

Written by Öykü Naz Çetin

Women's rights have been a longstanding struggle, yet they are still not fully secured today. Around the world, women continue to fight for equal rights in various fields, including education, employment, politics, and social life.

The Historical Process of the Equality Struggle

The women's rights movement gained momentum in the 18th and 19th centuries. One of the first major steps was the **Seneca Falls Convention** held in the **United States in 1848**. This conference marked a turning point where women demanded fundamental rights, particularly the **right to vote**. In the 20th century, women in many countries gained the right to vote, and significant legal advancements were made regarding women's rights. However, these achievements were not implemented equally in every society.

Article Continues on Page 11 →

Challenges Women Face Today

Although progress has been made in women's rights, many challenges persist:

- **The Gender Pay Gap:** In many countries, women earn lower wages than men for doing the same job.
- **Access to Education:** In developing countries, girls often have more limited access to education compared to boys.
- **Violence and Harassment:** Women face serious threats such as domestic violence, sexual harassment, and femicide.
- **Lack of Political Representation:** Women's representation in politics is still not as strong as men's. In many countries worldwide, the percentage of female members of parliament is below 30%.

As this article highlights, women are still not given equal importance compared to men. However, history has shown that whenever women have been given opportunities, they have made the most of them. **Denying a child the right to education not only affects their future but also deprives society of the contributions they could make.** This education is not limited to academics but includes fields such as music, art, sports, and many others. A child's life should not revolve solely around school subjects—**talent can manifest in any field.** If a child is interested in music, they should be encouraged and allowed to develop in that area. **Everyone feels free and thrives in the space where they are happy, and this success can take them to great heights.** Most importantly, they will have chosen what is best for themselves.

Trying to direct children based on parental preferences can alienate them from both their parents and the world.

Violence Against Women

In countries where violence against women is high, it is often due to inadequate legal penalties. Additionally, in many societies, men use violence as a way to assert dominance, but **violence is never a measure of strength!**

Countries with High Rates of Violence Against Women

- **Turkey** – 37.4%
- **Colombia** – 37.4%
- **Costa Rica** – 36%
- **United States** – 35.6%

In these countries, a significant percentage of women experience **partner violence** during their lifetime. Even though these percentages may seem small, in actual numbers, they represent a **vast** number of victims.

Countries with Lower Rates of Violence Against Women

Among OECD countries, those with the lowest rates of violence against women are:

- **Canada** – 2%
- **Chile** – 7%
- **Switzerland** – 10%

Article Continues on Page 12 →

Although these rates are lower than in other countries, **they are still unacceptable.**

✦ **Note:** In 2023, an average of **140 women and girls** were killed **daily** by their partners or family members. This amounts to approximately **51,100 women per year** losing their lives due to **domestic violence**.

Sexual Harassment and Assault Against Women

Every day, more women and girls become victims of sexual harassment or assault. The main reasons for this ongoing issue include the **inadequate enforcement of laws** or the **lack of strict legal measures** altogether.

Countries with High Rates of Sexual Harassment and Assault

Sexual harassment and assault remain critical issues worldwide. Data from various sources indicate alarming rates in several countries:

- **Ethiopia** – Approximately **60%** of women have been sexually assaulted.
- **India** – Every **22 minutes**, a woman is raped, with many cases involving close relatives.
- **Turkey** – According to **OECD 2019** data, **38%** of Turkish women have experienced physical and/or sexual violence by their spouse or partner at least once in their lives.
- **United States** – According to **RAINN**, a **sexual assault or harassment occurs every 73 seconds**, and **1 in 6 women** has been raped or experienced attempted rape.
- **Sweden** – Despite being one of Europe's most progressive countries, Sweden has **one of the highest rates of rape and sexual assault** in Europe.

These statistics demonstrate that **sexual violence against women knows no geographical, cultural, or economic boundaries**. In every society, it is crucial to implement **comprehensive legal regulations, awareness campaigns, and support mechanisms** to combat this issue effectively.

⚠ **We must remember that women's rights are human rights. A truly just world cannot exist without ensuring equality in every aspect of society.**

Coeur de Musique

Written by *Ezra Güreş*

Colombian Musicians Teach Creativity to School Children

Pupils from St Mary's Primary came together in rhythm with visiting musicians from Colombia in South America. The Mr Klaje Collective from Cali in the South American country rap, sing, dance, play, and drum. In their home city they use the power of music of bring former gang member together, promoting peace and reconciliation through teaching creativity.

Article Continues on Page 13 →

According to guitarist Juan Manuel Gomez, music is an ideal way to do that. ***"The music connects the people and secures a space to start to speak about the problems, the life"***, he told in the news.

Charli XCX Named Brits Songwriter of the Year

Popstar Charli XCX has been named songwriter of the year by the Brit Awards. The English singer already had the most nominations of any artist this year — five in total — recognizing the global success of her agenda-setting album, *Brat*. She is also up for album of the year best dance act, best pop artist, and song of the year for *Guess*, her duet with Billie Eilish.

Kendrick Lamar and SZA to Play Cardiff Summer Gig

Kendrick Lamar and SZA are set to take the stage at Cardiff's Principality Stadium in July. The American rapper performed on Sunday at the Super Bowl, which was for many a victory lap following his knock-out blow in a long-running beef with fellow rapper Drake. The star won five Grammy awards for *Not Like Us*, his brutal takedown of rap rival Drake, and is now set to take on Europe and the UK in a summer tour with singer SZA.

SUM-MUSIC!

La Francophonie

Written by **Betül Sülün Deniz**

La Semaine de la langue française et de la Francophonie est organisée du 15 au 23 mars 2025. Cette semaine permet de célébrer la langue française à travers de nombreuses animations organisées partout en France et à l'étranger.

1. Une langue parlée dans le monde entier

Plus de 200 millions de personnes parlent français sur les 5 continents. La Francophonie regroupe 68 États et gouvernements. Le français est la langue étrangère la plus largement apprise après l'anglais et la neuvième langue la plus parlée dans le monde.

2. Une langue pour trouver un emploi

Parler français et anglais est un atout pour multiplier ses chances sur le marché international de l'emploi. La connaissance du français ouvre les portes des entreprises françaises en France comme à l'étranger dans tous les pays francophones (Canada, Suisse, Belgique et continent africain).

Article à Suivre en Page 14 →

3. La langue de la culture

Le français est la langue internationale pour la cuisine, la mode, le théâtre, les arts visuels, la danse et l'architecture. Connaître le français, c'est avoir accès en version originale aux grands textes de la littérature française et francophone mais également au cinéma et à la chanson. Le français est la langue de Victor Hugo, de Molière, de Léopold Sedar Senghor, d'Édith Piaf, de Jean-Paul Sartre, d'Alain Delon.

4. Une langue pour voyager

La France est le pays le plus visité au monde avec plus de 70 millions de visiteurs par an. Avec des notions de français, il est tellement plus agréable de visiter Paris et toutes les régions de France mais aussi de comprendre la culture, les mentalités et l'art de vivre à la française. Le français est tout aussi utile lorsqu'on visite l'Afrique, la Suisse, le Canada, Monaco, les Seychelles...

5. Une langue pour étudier dans les universités françaises

Parler français permet notamment de poursuivre ses études en France dans des universités réputées ou dans les grandes écoles de commerce et d'ingénieur, classées parmi les meilleurs établissements supérieurs en Europe et dans le monde.

6. L'autre langue des relations internationales

Le français est à la fois langue de travail et langue officielle à l'ONU, dans l'Union européenne, à l'UNESCO, à l'OTAN, au Comité International Olympique, à la Croix Rouge Internationale... et de plusieurs instances juridiques internationales. Le français est la langue des trois villes sièges des institutions européennes : Strasbourg, Bruxelles et Luxembourg.

7. Une langue pour s'ouvrir sur le monde

Après l'anglais et l'allemand, le français est la troisième langue sur Internet devant l'espagnol. Comprendre le français permet de poser un autre regard sur le monde en communiquant avec les francophones sur tous les continents et en s'informant grâce aux grands médias internationaux en langue française (TV5, France 24, Radio France Internationale).

8. Une langue agréable à apprendre

Le français est une langue facile à apprendre. De nombreuses méthodes existent pour apprendre le français en s'amusant qu'on soit un enfant ou un adulte.

9. Une langue pour apprendre d'autres langues

Apprendre le français aide à apprendre d'autres langues, notamment les langues latines (l'espagnol, l'italien, le portugais ou le roumain) mais aussi l'anglais puisque le français a fourni plus de 50% du vocabulaire anglais actuel.

10. La langue de l'amour et de l'esprit

Apprendre le français, c'est d'abord le plaisir d'apprendre une belle langue, riche et mélodieuse qu'on appelle souvent la langue de l'amour. Le français est aussi une langue analytique qui structure la pensée et développe l'esprit critique ce qui est très utile dans les discussions ou des négociations.

The Battle of Çanakkale

Written by *Fatih Selçuk*

Few battles in modern history have influenced global events as profoundly as the Gallipoli Campaign, commemorated as the 18 March Çanakkale Victory and Martyrs' Remembrance Day.

Historically, Çanakkale (Dardanelles) has strategic importance, controlling a strait linking Asia and Europe and connecting the Mediterranean Sea to Istanbul and the Black Sea. Its significance escalated notably with Russia's rise as a political power, as control over the Dardanelles became essential for Russia to access the Mediterranean and prevent enemy advancement.

Road to the Battle of Çanakkale

Late 19th-century Europe saw rising tensions due to Germany's increasing power, threatening Britain, France, and Russia, leading to rival alliances and setting the stage for World War I. The Ottoman Empire, weakened by losses in the Balkan Wars, aligned with Germany after unsuccessful negotiations with the Allies.

When war erupted in 1914 following the assassination of Archduke Franz Ferdinand, the Ottoman Empire officially joined Germany after German ships Yavuz and Midilli attacked Russian ports. The Allies aimed to swiftly eliminate the Ottoman threat by capturing Istanbul through the Çanakkale Strait, providing direct support to Russia.

Naval and Land Battles

Britain and France's naval attack in February 1915 initially progressed but failed dramatically on 18 March due to Turkish mines laid by Nusret minelayer under Commander Cevat Pasha's orders. Several Allied ships sank, forcing a retreat and significantly damaging Allied prestige.

The Allies launched a major land invasion on 25 April 1915, involving British, French, and ANZAC forces. Fierce Turkish resistance, notably led by Mustafa Kemal (Atatürk), resulted in a brutal stalemate. After months of trench warfare, Allied forces withdrew in December 1915.

Consequences

Though it temporarily boosted Ottoman morale, the victory did not prevent eventual defeat in World War I. However, the Gallipoli Campaign had profound long-term impacts:

- Influenced the Turkish War of Independence, providing Mustafa Kemal with credibility and inspiration for future resistance.
- Extended World War I, intensifying global casualties and influencing harsh post-war treatment of the Ottoman Empire by the Allies.
- Indirectly triggered the 1917 Russian Revolution by isolating Russia, causing internal turmoil and ultimately facilitating Bolshevik control, significantly reshaping 20th-century geopolitics.

Ultimately, the Gallipoli victory profoundly influenced national identities and global geopolitics, leaving a lasting historical legacy.

Alan Rickman: A Life in Acting

Written by İrem Geyik

Alan Rickman was born on February 21, 1946, in Hammersmith, London, to a working-class family. His father, a factory worker, passed away from lung cancer when Rickman was eight, leaving his mother to raise four children. He showed early talent in calligraphy and watercolor painting. Rickman attended Latymer Upper School, where he developed an interest in theater, and later studied graphic design at Chelsea College of Art and the Royal College of Art. After working as a graphic designer, he decided to pursue acting, enrolling at the Royal Academy of Dramatic Art (RADA) from 1972 to 1974.

After graduating, Rickman performed in various theater productions, including Chekhov's *The Seagull*, and worked with the Royal Shakespeare Company. His breakthrough role came in 1985 as Vicomte de Valmont in *Les Liaisons Dangereuses*, earning him a Tony Award nomination when the production moved to Broadway.

Rickman gained international fame with his portrayal of Hans Gruber in *Die Hard* (1988), a role he nearly turned down. His performance became iconic, earning a place on AFI's 100 Heroes & Villains list. He continued playing memorable villains, such as the Sheriff of Nottingham in *Robin Hood: Prince of Thieves* (1991), and also took on romantic and dramatic roles in *Sense and Sensibility* and *Truly, Madly, Deeply*. His portrayal of Rasputin in *Rasputin: Dark Servant of Destiny* won him a Golden Globe and an Emmy.

From 2001 to 2011, Rickman portrayed Severus Snape in the *Harry Potter* series, a performance widely praised by critics and audiences alike. He also showcased his comedic talent in *Galaxy Quest* and *Love Actually*. Later roles included *Sweeney Todd*, *Perfume: The Story of a Murderer*, and voice work in *Alice in Wonderland* (2010).

Beyond acting, Rickman directed *The Winter Guest* and co-created *My Name Is Rachel Corrie*, winning a Best Director award. He remained active in theater, starring in *Private Lives* and *John Gabriel Borkman*, among others. In 2009, he received the James Joyce Award for his contributions to the arts.

Rickman was in a lifelong relationship with Rima Horton, whom he married in 2012 after nearly 50 years together. They had no children. He supported charitable causes, including the International Performers' Aid Trust.

In August 2015, he was diagnosed with pancreatic cancer but kept his illness private. He passed away on January 14, 2016, at age 69. Tributes poured in from colleagues, including J.K. Rowling, Emma Watson, and Daniel Radcliffe, who praised his mentorship and generosity. Kate Winslet and Helen Mirren lauded his unforgettable voice and warmth. His legacy as one of cinema's most distinctive and talented actors endures.
